

$\sigma=0$     $\sigma=0.01$     $\sigma=0.02$     $\sigma=0.05$

\* ODEFormer: reconstruction accuracy as re-evaluated by the FIM-ODE paper (arXiv:2602.08733);  $\rho=0$  only — its primary tables were not retrievable, and it was not run here (pretrained weights unreachable). Local methods: 63 systems, single seed, identical corruption, integrator and metric.
